Current	Proposed
<p><u>Master of Engineering (M. Engr.)</u> The degree of Master of Engineering (M. Engr.) will be granted on the following conditions:</p> <p>(A) The candidate shall have completed the requirements for the Bachelor's degree in one of the colleges or schools of the University of California or at another college or university of approved standing.</p> <p>(B) The candidate shall have completed the substantial equivalent of the basic requirements for the degree of Bachelor of Science in Engineering in addition to the minimum requirements stated in paragraph (C) below.</p> <p>(C) The candidate shall have met the residence and course requirement for the Master's degree established by the Graduate Council and shall have demonstrated competence in the design of engineering systems. The program shall consist on such courses as will prepare the candidate in the discipline of engineering design, and will also include such courses and activities as will broaden the student through contact with the contributing and contiguous areas of knowledge. Subject to the approval of the Graduate Council, the program of study will be determined and administered by the Department of Engineering and administered by the School of</p>	<p><u>Master of Engineering (MEng.)</u> The degree of Master of Engineering (MEng) will be granted on the following conditions:</p> <p>(A) The candidate shall have completed the requirements for the Bachelor's degree in one of the colleges or schools of the University of California or at another college or university of approved standing.</p> <p>(B) The candidate shall have completed the substantial equivalent of the basic requirements for the degree of Bachelor of Science in Engineering in addition to the minimum requirements stated in paragraph (C) below: a one-year program of graduate study (normally including a summer term) and other program requirements as prescribed by the Faculty of the Henry Samueli School of Engineering and Applied Science at the University of California, Los Angeles.</p> <p>(C) The candidate must maintain a "B" average in all course work undertaken as a graduate student at the University of California.</p> <p>(D) The candidate shall have met the requirements for the Master's degree as determined by Graduate Council.</p> <p>(E) A comprehensive final examination in</p>

Engineering and Applied Science.

- (D) The candidate must maintain a "B" average in all course work undertaken as a graduate student at the University of California.
- (E) The program of work of each candidate shall be under the supervision of a faculty committee appointed by the Dean of the School of Engineering and Applied Science.
- (F) A comprehensive final examination in the area of the program or an engineering report of a design project is required of each candidate. The choice of method in meeting this requirement shall rest on the preparation of the student and shall be at the option of the School of Engineering and Applied Science.

~~the area of the program or an engineering report of a design project is required of each candidate. The choice of method in meeting this requirement shall rest on the preparation of the student and shall be at the option of the School of Engineering and Applied Science.~~ A capstone project in a technology concentration is required of each candidate.
